

Lymphadenopathy

This is a grayscale chest X-ray. Two green rectangular boxes are overlaid on the image. The upper box, labeled 'Lymphadenopathy', is positioned over the upper mediastinum and the upper portion of the lung fields. The lower box, labeled 'Airspace opacification', is positioned over the lower lung fields, specifically the right lower lobe. The background shows the typical anatomical structures of a chest X-ray, including the lungs, heart, and ribs.

Airspace opacification
