

Lymphadenopathy

This is a lateral chest X-ray. The image shows the thoracic cavity with the spine on the left and the ribs on the right. Three green rectangular boxes are overlaid on the image to highlight specific findings. The top box, labeled 'Lymphadenopathy', is located in the upper posterior region, likely over the mediastinum. The middle box, labeled 'Airspace opacification', is located in the middle posterior region, likely over the lung parenchyma. The bottom box, labeled 'Pleural effusion', is located in the lower posterior region, likely over the costophrenic angle. The labels are in bold black text on a white background.
