

A frontal chest X-ray showing the lungs, heart, and bony thorax. Several rectangular bounding boxes of different colors are overlaid on the image to highlight specific findings. Each box is accompanied by a text label indicating the finding and its associated probability score. The findings include interstitial opacification, lymphadenopathy, airspace opacification, and pleural effusion, all with scores of 0.27 or higher.

Interstitial opacification 0.27

Lymphadenopathy 0.49

Lymphadenopathy 0.34

Airspace opacification 0.71

Airspace opacification 0.47

Pleural effusion 0.27
